

◀ Transportable Pelican Case

Pelican has introduced the 1610 case, designed for photographers who need to protect a lot of gear. This model has the same features as Pelican's slightly larger 1620 case—it's watertight, airtight, dustproof, crushproof, and will tote camera equipment up to 60 pounds. The outside of the 1610 case measures 24 1/2 x 19 x 11 1/4 inches, while the inside dimensions are 22 1/2 x 17 x 10 1/2 inches. It's transportable, with two-inch "quiet roll" urethane wheels and a retractable extension handle. The case is available in black or silver. Compact Camera Platform ▶

Resembling a small beanbag, The Pod offers customized support for digital, compact, and SLR cameras. It features a water-resistant nylon exterior, Velcro-sealed contents, and a locking bolt to secure the Pod to your camera's tripod attachment. The compact, lightweight Pod has a circumference of just five inches, and can easily be taken anywhere. www.thepod.ca

▼ Digital Camera From Handspring

Handspring, Inc. has added the tiny new eyemodule2 digital camera Springboard module to its product line. The eyemodule2 digital camera slides into the Springboard expansion slot on the back of Handspring's Visor handheld devices. It allows you to easily capture and view digital images in a variety of formats: full VGA-resolution images, palm-sized images and mini-movie clips. After synchronizing with a PC or Macintosh computer, all images are available in a JPEG format on a desktop, and can then be e-mailed or printed. The included eyecontact software application can also attach images to address book entries. Handspring, Inc., 189 Bernardo Ave., Mountain View, CA 94043. 650/230-5000. www.handspring.com

Digital Imaging Software From ACDSee ▶

ACD Systems has announced the most recent version of its digital imaging software, ACDSee 4.0. This program features a redesigned user interface that supports over 50 image and multimedia formats, image management, multimedia compatibility, and new printing and sharing options. ACDSee 4.0 also allows you to capture images directly from your camera and to view, edit, and print images from your digital camera.
